The screenshot displays the iBwave Design Lite interface. On the left, an indoor prediction map shows signal strength distribution across a building layout. A legend on the right indicates RSRP [dBm] levels, ranging from >-60.00 (0.0%) to >-120.00 (98.0%). The map shows a color gradient from blue (low signal) to red (high signal). A vertical scale on the right indicates a height of 7.00 m. The map also shows antenna locations and signal paths.

On the right, a 'Compliance Report' window is open, displaying the following data:
